A contribution from the outcomes of the Italian G7 Presidency

Andrea Gumina, Expert on Innovation, Digital Economy, Next Production Revolution, Italian G7 Presidency 2017, Italy

First Preparatory Meeting of the 26th OSCE Economic and Environmental Forum "Promoting economic progress and security in the OSCE area through innovation, human capital development, and good public and corporate governance". Vienna, 22-23 January 2018.

Innovation and the G7 Italian presidency: key messages

- The G7 Italian Presidency has recognized the opportunities and the challenges linked to the **Next Production Revolution** (NPR) and commit to spreading its benefits to all.

- They call for larger efforts among Countries, so as to coordinate and strengthen their actions to **make innovation a catalyst for prosperity, sustainable development and inclusive growth**.

2

Challenges in the NPR era require holistic policies and wide engagement

- A "**G7 People-Centered Action Plan on Innovation, Skills and Labor**" has been adopted by Leaders in Taormina, as a **comprehensive, holistic policy framewor**k to pursue a successful, orderly and fair transition towards the NPR.
- In addition, the G7 Taormina Leaders' Summit **provided commitments** on Innovation, Skills and Labor, **by tasking competent Ministers** to further elaborate the Action Plan and to translate them into detailed policy proposals, during the **Turin Innovation Week** (September 2017).
- Finally, Leaders **reinforced stakeholders' engagement**. As part of this strategy, in particular, they set up the "**I-7**", so as to foster dialogue between the G7 and the innovators.

OSCE 3

The G7 People-Centered Action Plan on Innovation, Skills and Labor

- Paragraphs 34 to 37 of the Leaders' Communiqué identified **Leaders' commitment on Innovation, Skills and Labor**
- Amongst them, the **Action Plan** defined **9 Key Policy Priorities within 3 pillars.**

Innovation, Skills and Labor in the era of the Next Production Revolution		
Pillar I	Pillar II	Pillar III
Innovation in Production (KPP 1-3)	**Knowledge-Based Capital and Enabling Infrastructure** (KPP 4-7)	**Future of Work** (KPP 8-9)

- Ministers of ICT, Industry, Science and Labor further developed them.

OSCE 4

Reaping the benefits, avoiding the backslash: some concrete suggestions

- Put **people at the center** of any innovation-affected process
- Build and integrate the **Infrastructure** for the Next Century
- Set together a **fair, common playground** for people, business, scientists to accede the NPR
- **Rebalance** the platform economy

Digital Transformation of the Italian Public Administration

It's day one!

teamdigitale.governo.it/en   @diegopia, @ITdigitalteam

Sept 2016

Creation of the Italian Government Commissioner for the Digital Agenda

A new government entity, at the Presidency of the Council of Ministers, with a strong and centralized **governance,** composed of experts with different technology **skills,** in order to design a **strategy** and **technology** path for the digital transformation of the country, and to **supervise** the activity of the current digital agency (AgID)

·D

Three Year Plan for the Digital Transformation of the Italian Public Administration

The first strategic document that guides Public Administration in an organic and coherent process of digital transformation

In line with the European objectives: digital by default, once-only principle, inclusiveness & accessibility, openness & transparency, cross-border by default, interoperability by default, trustworthiness & security

·D

Building blocks (re)launched

Digital Payments - PagoPA
A central payments node for all administrations

Digital Identity - SPID
A digital identity to easy access digital public services

National Database Register - ANPR
A single national database for all Italian residents

New building blocks

Developers Italia
The open development platform for the community of developers of digital public services
Designers Italia
The open designers platform for the community of designers of digital public services

Data & Analytics Framework
The data engine for the sharing and analysis of public data through modern big data and machine learning techniques

API Ecosystem
An API Management system, standards and guidelines to let public administrations communicate via API
